

Project Management with Git

Syllabus Improvement Release Snapshot

This PDF is used in the FDP as a final-release artifact.

Participants track editable Word, PowerPoint, Excel, CSV and text files in Git, then tag a stable PDF version as an approved release.

Course	Project Management with Git
Course Code	25BCSAL307A
Semester	3
Workshop Goal	Collaboratively improve the syllabus while learning Git
Recommended Release Tag	v1.0

Release Checklist

- README.txt updated.
- Experiment plan reviewed.
- Rubric reviewed.
- Pull Request approved and merged.
- GitHub Actions check passed.
- Release tag created.

Teaching Note

PDF files are useful as final approved artifacts.

They are not ideal for line-wise diff or merge conflict demonstrations.

Use TXT and CSV files for those Git concepts.
